

# Baltimore City 55 Neighborhood Community Statistical Areas

The communities for which data are presented here represent the work of the Baltimore City Planning Department and the Family League of Baltimore City, for use by the Baltimore City Data Collaborative. Community boundaries were drawn in consideration of both the City's neighborhood/community organizations, as well as existing Census tract boundaries, which was necessary for the creation of statistical profiles. The Data Collaborative Community boundaries are not to be confused with the neighborhood boundaries defined by the Baltimore City Planning Department.
